

OLON®

IT ALL COMES
TOGETHER

ACCESSORY MOULDING PROGRAM

Olon presents 14 beautiful and versatile accessory mouldings that reflect multiple trends, are available in 200+ TFL & HPL colours and can be combined into even more exciting moulding build-ups to accentuate all your furniture and cabinet building needs.

ACCESSORY MOULDINGS

CPD95 / UPD95 PROGRAM

See your CPD95 or UPD95 price pages for more information.

Olon profiles offer the most complete program wrapped with our NEXGEN® laminates. They are available in 14 stock profile styles in exact matches to over 200+ North American TFL & HPL colours and perfectly complete our 5 piece door program.

For a complete list of available colours, please consult the CPD95 and UPD95 colour lists available on our website at www.olon.com.

Olon's unique trademarked laminate process, NEXGEN®, uses TFL (Melamine) and HPL décor paper saturated with specialty resins that allow the laminate to be very flexible while maintaining the colour as well as the heat & wear resistance of TFL. This formulation allows Olon to provide a pre-finished product with synergistic products to the woodworking industry with the following features:

- Perfect match with no discoloration or fading over time
- Exceeds CARB2 emission norms
- Antimicrobial protection, resistance against bacterial growth on the surface
- Surface performance comparable to TFL & Vertical Grade HPL
- Delamination resistant in high heat environments
- Outperforms vinyl, foils and topcoated papers

OLON MOULDINGS ARE VERY VERSATILE AND MANY HAVE ALTERNATIVE USES:
